NOTE: CPU current/voltage monitoring (CPU\_SENSE\_I/CPU\_SENSE\_V) requires 100K/10uF RC filter at SMU pins. Caps should connect to GND\_SMU\_AVSS. CPU\_VREF should be same signal or reference used by monitoring circuit, but be aware that this will affect other analog inputs such as AC adapter ID.

NOTE: All analog inputs to SMU should have a 100pF capacitor to the SMU AVSS signal (GND\_SMU\_AVSS). None of those capacitors are provided on this page.

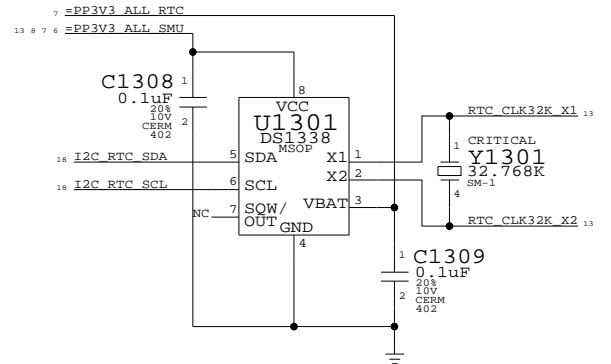

NOTE: Some primary and alternate functions require pull-ups that are not provided on this page. Please review the latest SMU specification to ensure missing pull-ups are provided on another page.

NOTE: Pinout matches SMU pinout v1.51.
