

Vorschau

Mynd enables every person to create videos without a camera, narrator or a production crew. You just add a screenshot, mark a section, type a description, and Mynd turns these into a live video. You can help your customers understand your product instantly, Onboard and train new employees in no time or build unique content to drive your inbound and content marketing strategy.

Website 

Support 

Mynd is everything you need to create, share, localize & track customer-facing videos. The majority of the world population does not speak English, with Mynd we've streamlined the process of localization and translation management into a one-click operation

- Easy

Select screenshots, write a description, now repeat, till your story is done, that's it!

- Update in seconds

Any change, update or maintenance flow happens on-the-fly. it's just one click away

- Narration

From text to speech, in different languages or voices, you are in control of how your movie would "sound"

- iCloud

With iCloud, your whole library syncs back and forth between all connected devices, and you can always continue where you left off.
