NO	NO	NO	NO	NO	NO	NO	NO
BT not recognized at all anymore. Apps unresponsive after combo 2	Same, BT apps responsive but no function	Same, BT apps and pref pane return to unresponsive	1st time: boot to grey screen and cursor, once in a while cursor disappears and returns 2nd time: KP	WIPED & redid everything with new method. Same issue of no pref pane etc	No boot	Boots, pref pane works, 10.5.8 BTSA crashes b/c can't open MainMenu.nib	App still crashes, no console error

NO	NO	NO	NO	NO	NO
Pairs with device. No file exchange. (app crashes) BTSA appears fully functional (v2.2b5)	Made a mistake and deleted the OG 10A190 BTSA. Replaced with one from pre-made image and does not work anymore	Replaced with BTSA from 10A190 client install DVD, this (v2.2b4) functions just like v2.2b5. Disconnect immediately	Won't recognize new devices anymore. Says connected to speaker but isn't. Check premissions	Nope	BT not recognized anymore
