FluTooth

By 👤 Jordi Bruin

A simple Mac utility that turns off Bluetooth when you close your MacBook, and turns it back on when you open it again.

In an attempt to solve the battery drain issues I was having.

It seemed to solve the problem for me, so sharing it now. Let me know if this doesn't solve the problem for you, so I can add more things to the app to try to find the cause!

To use FluTooth, install these two Shortcuts :

https://www.icloud.com/shortcuts/287c0546523849438726b7e74da012de

https://www.icloud.com/shortcuts/28d60d847dca44f2bb23dfb386466827

Changelog

0.1 - Initial release

0.2 - Fixed the button to toggle Launch on Startup

In version 0.3 the app will guide you through installing the Shortcuts, thanks for the feedback !
