# About iOS 11.4 beta 6

The iOS 11.4 SDK provides support for developing iOS apps for iPhone, iPad, or iPod Touch devices running iOS 11.4. The SDK comes bundled with Xcode 9.4 available from the Apple Developer Program download page.

For information on the compatibility requirements for Xcode 9.4, see the Release Notes on the Xcode download page.

## Bug Reporting

For issues not mentioned in [Notes and Known Issues](#), file bugs through the Apple Developer website <https://developer.apple.com/bug-reporting/>.

When filing a bug, please include the full version number in the bug title and in the description. This looks like "11.4 (15Fxxxx)." You can find the full version number in Settings > General > About > Version.

## Technical Support and Learning Resources

Apple provides the following resources to support your development:

- Developer documentation is available both on <https://developer.apple.com/documentation> and from Xcode by choosing Help > Developer Documentation.
- [Apple Developer Forums](#). Participate in discussions about developing for Apple platforms and using developer tools.
- [iOS 11.4 Developer Forum](#). Participate in discussions about developing for iOS 11 and issues with the SDK.
- [iCloud for Developers](#). Find information about developing for iCloud.
- [iOS homepage](#). Get high-level information about the latest release of iOS. Download current and beta iOS releases.
- For help with using Xcode, Simulator, or Instruments, choose Help > *app name* Help.

# New in iOS 11.4

## Messages in iCloud

iOS 11.4 beta includes Messages in iCloud for testing and evaluation purposes. Messages will prompt users to turn on Messages in iCloud on first launch after upgrading to iOS 11.4 beta. Please note that Messages in iCloud is automatically enabled for users who have two-factor authentication and iCloud Backup enabled.

## Notes and Known Issues

### Foundation

#### Known Issues

- Clients of `NSURLSessionStreamTask` that use a non-secure connection fail to connect when an error occurs during PAC file evaluation and the system is configured for either Web Proxy Auto Discovery (WPAD) or Proxy Automatic Configuration (PAC). A PAC evaluation failure can occur when the PAC file contains invalid JavaScript or the HTTP host serving the PAC file is unreachable. (33609198)

**Workaround:** Use `startSecureConnection` to establish a secure connection.

### Vision

#### Known Issues

- Facial landmarks identified by the Vision framework may flicker in temporal use cases such as video. (32406440)

### Xcode

#### Known Issues

- Debugging a disabled Messages extension may cause Messages to crash. (33657938)

**Workaround:** Before starting the debug session, enable the extension by tapping the More (...) button to show the list of apps, then tapping the Edit button, and then tapping the switch to turn on the extension.

- After a simulated iOS device starts up, it's not possible to pull down the Lock screen. (33274699)

**Workaround:** Lock and unlock the simulated device and then reopen Home screen.
