

Hey guys! This is an example of the iFaraday stylus pen for iPad or iPhone. The ^{tip} might seem hard, but it is actually very soft and you can write on it with ease and at all sorts of angles unlike other stylus pens such as the bamboo. I am also using the new note taking app that recently came out called Notability. The UI is very simple and very easy to use! I also have a powersupport matte screen protector hd on my iPad 2 if anyone is wondering. I have no problems writing at all and I am totally happy with this new stylus that I have received after 10 days ever since I paid. Hope you guys will enjoy it as much as I do! 😊
